Feel safe, even in emergency situations. The Amplimesh fire egress security system has been designed and tested to prevent unwanted visitors from entering your home via the windows, but provides you and your family with an escape path in the event of a fire or other critical situations that may arise in your home.

It is a window screen that comes with an open outward capability or with sliding functionality to allow for exit in the event of an emergency. The slim-line keyless design is available in stainless steel mesh and aluminium grille and are designed to allow you to gain access to the glass for ease of cleaning.
